Overview of Smart Dialer

Smart Dialer is an application designed by "Informobility L.L.C" to help you easily look up your phone numbers, names, calls history in more than one search way. It makes it very easy to place your calls.

Software Features

- Arabic support for Windows Mobile 2003 required.
- Phone dialer permits you to call anyone in your Contacts or SIM database using one finger.
- Shares database with Contacts.
- Contact list displays contact name and phone numbers.
- Order contact by first or last name.
- Two search methods: Classic and smart.
- Send text messages (SMS).
- Call history.
- SMS database contains over 1,000 canned messages for every occasion ordered by category.
- Arabic, English, and numeric interfaces.
- Easy to navigate and very user friendly.

Find Contact

There are several ways to find contact in long contact list.

To find contact-by-contact name:

1. If you are not in appropriate language view, tap  to convert dialer buttons language between Arabic, English, and Numeric.
2. Begin entering a name until the contact you wanted is displayed.
 - To Show all contact tap 
 - To navigate between contacts tap 

Make a Call

There are two ways to make a call

- From Numeric view, enter the number you want to call, and then tap 

- From alphabetical view, navigate to the contact you want to call by typing contact name or through tapping , to make it the first viewed contact in contact list, and then tap 

Note

The first contact viewed contact in contact list highlighted in different color.

Send SMS

1. Navigate the contact that you want to send SMS.
